

BLOMBERGER HOLZINDUSTRIE
B. HAUSMANN GMBH & CO. KG

**Equipment for protecting
and securing loads in
commercial vehicles**

Competence through experience

The company – from the oldest plywood plant in the world to supplier of high-tech materials.

Blomberger Holzindustrie B. Hausmann GmbH & Co. KG develops and produces speciality plywood for the highest technical demands at several European locations under the trade-name DELIGNIT. Our products are used in more than 45 industries worldwide, such as in automobile manufacturing, structural and industrial engineering, as well as tool making. As the oldest plywood plant in the world still in existence, we were able to secure our position as the leading manufacturer of beech plywood to this day – a position we achieved and maintained over the last 100 years.

Our products are often used these days as system solutions, for example, as highly wear and abrasion resistant floors in the heavy commercial vehicle industry, as bullet resistant and fire resistant panels in structural engineering and, as well, for skid pads in Formula 1 cars.

The VANYCARE® principles of protection and safety

The Task

Even after just a few uses, the unprotected interior of your vehicle can be seriously damaged by sliding cargo, sharp and hard edges or by spilled liquids. The loss in value is great.

The Solution

VANYCARE® cargo protection, consisting of floor, lining and partition elements, turns the rough interior of your vehicle into a smooth, functional yet very tough cargo space.

The VANYCARE® Program

The basic protection for cargo area – ready-to-install, perfect-fit, robust

- VANYCARE® Floor
- VANYCARE® Lining
- VANYCARE® Impact protection for partition wall (cargo side)

Installation Accessories

- VANYCARE® Glue Kit for VANYCARE® Floor installation
- VANYCARE® Quick-Fix Kit for VANYCARE® Floor installation

Accessories for securing and protecting cargo

- VANYCARE® Alu-Finishing strip
- VANYCARE® Cargo Lashing Rails for VANYCARE® Lining

Repair

- Basic panels for VANYCARE® Floor and Lining

VANYCARE

VANYCARE® Cargo space protection for commercial vehicles installation

VANYCARE® – advantages in a glance

Floor and Lining kits are available in different material and machining variations (Product Lines Professional, Basic and Economy)

- The Professional Program is available from stock (Floor and Lining equipment) for all current European Transporter/Cargo Van models. Delivery from stock, also available in single kits.
- The Basic and Economy Programs are available with special order (no stocking, order quantity to be agreed upon).
- guaranteed OEM quality
- machined / perfect-fit
- secure footing
- high resale value
- ready to install including fasteners
- model specific
- quick and easy installation
- increase in value

The VANYCARE® 7^{Plus} Principle

Material^{Plus}

The Professional, Basic and Economy grades are made from different raw materials. All the VANYCARE® Floors have particularly wear and abrasion resistant surfaces made from robust beech hardwood veneers. In the Professional grade, VANYCARE® Linings are made from robust plywood and in the Economy grade they are made from high density fibre board (wood-based). Both grades have abrasion resistant film overlays.

To meet the typical demands placed on floors and linings, the surface of the base material is covered with a PVC-free synthetic film. The reserve sides of slip resistant VANYCARE® Floors (beech hardwood veneers) feature an unique, patented DBS (Direct Bond Surface).

Installation^{Plus}

The ready-to-install kits consist of perfectly-fitting, CNC machined parts. Generic equipment has been developed for today's basic vehicle models and offers in some cases the possibility for adjustment to a particular vehicle. You can also order, at additional cost, accessories for gluing the VANYCARE® Floors. As well, fasteners and an installation guide are also available.

1 Manufacturer^{Plus}
Oldest existing plywood plant in the world, with over 100 years of knowledge in the production of the technical specialty plywood DELIGNIT®.

2 Material^{Plus}
Production know-how based on manufacture of a Beech hardwood plywood that has an exceptional wear and abrasion resistance. The panels are recognized by the Blue Angel, which represents products that are particularly environmentally friendly and offer ecologically low emissions.

3 Quality^{Plus}
A permanent system of internal and external quality control based on DIN ISO 9001 2000/ISO/TS 16949 2002.

4 OEM^{Plus}
Original part quality, products are used in original installation by leading manufacturers of light commercial vehicles.

5 Installation^{Plus}
VANYCARE® is ready to install and includes installation guidelines/fasteners, its own installation patents allowing for quick and easy installation.

6 Safety^{Plus}
VANYCARE® uses the already existing lashing points in the vehicle's cargo area and strives to introduce additional possibilities for securing of cargo.

7 Supply Logistics^{Plus}
The Professional Program is available from our stock. Short delivery times for all of Europe. The Basic and Economy Programs are delivered after completion of production initiated by customer order.

Supply Logistics^{Plus}

We ensure delivery all over Europe through practical supply logistics. The parts are delivered in individual cardboard packages which incorporate special crush-zones for protection of contents during transport.

With the Professional Program we have achieved our goal to consistently maintain a stock of parts for all current light commercial vehicle models. Delivery of the additional Programs Basic and Economy also occurs shortly after production of our customers' orders.

Quality^{Plus}

The VANYCARE® quality symbol found on all original floor and wall sets assures that you are getting the security, material and workmanship at OEM level.

Application examples

Our customers - from manufacturer to end-user - rely on the OEM quality of VANYCARE® cargo space protection. A VANYCARE® installation represents the reliable basis for all types of systems in light commercial vehicles. As a result, renowned fleet managers have made the decision to use VANYCARE®. Using our experience and our know-how, we will support you as you change your requirements. We welcome your inquiries.
